PREFACE

The Historical Records Survey program was organized as a Nation-wide project of the WPA to inventory Stata, county, and municipal archives, early American imprints, church records, and manuscripts in collections. In Mississippi, the Historical Records Survey has operated as a unit of the Statewide Records Project in the Service Division and has been sponsored by the Mississippi Department of Archives and History and some seventy county boards of supervisors. The Survey is being discontinued in order that its personnel may be diverted to activities that have a direct and unqualified relation to the war effort. However, this volume is being published since practically all data had been compiled for publication previous to the redirection of the activities of the project.

The original plan of the Survey was to publish inventories of the churches and church records of each denomination in the State. Two such volumes were issued: Inventory of the Church Archives of Mississippi, Protestant Episcopal Church, Diocese of Mississippi, vii, 146 pp., mimeo. June, 1940; and Inventory of Church and Synagogue Archives of Mississippi, Jewish Congregations and Organizations, v, 41 pp, mimeo. November, 1940. Late in 1941 it was decided to abandon the plan of publishing separate inventories and to assist in the war effort to publish the vital statistics records of all churches surveyed.

Accordingly the Guide to Vital Statistics Records in Mississippi has been published to provide a checklist of existing archival materials relating to births, marriages, divorces, and deaths. The Guide is being issued in two volumes: Volume I, Public Archives, v, 62 pp. mimeo., April, 1942; and Volume II, Church Archives, v, 702 pp. Mimeo., July, 1942.

The paramount necessity and importance of all vital statistics records, especially birth records, has increased as the Nation prepared itself for defense, then entered into total war. Birth records are prerequisites for entrance into the services of the Army and Navy, for employment in war industries, and in other occupations. Birth records are needed to determine questions of parentage, heredity, legitimacy, personal identity, property rights, inheritance, citizenship, and entrance into schools. They also are needed in establishing claims to old age assistance, benefits from workmen's compensation, widows', mothers', and other pensions.

Death records are essential in ascertaining the cause of death, relative death rates, ratios of deaths to births, duration of life, and rates of life insurance. They are also valuable in comparing the relative health conditions in different States and communities, in controlling contagious diseases, in effecting the shipment of bodies from State to State, and in preventing and detecting crime. They are required for proof of death in the probate of wills, the settlement of estates, the establishment of claims for insurance and pensions, and proof of ancestry and heredity.

Marriage and divorce records are used to decide questions of parentage, heredity, legitimacy, property rights, inheritance, citizenship, pensions, benefits, marital relationships, in determining certain contractual rights and obligations, and for substantiating claims for exemption from selective service.

390823

A listing of divorce records, both county and State, will be found in Volume I of this Guide, Public Archives, pp. 44-60.

The arrangement of this volume of church archives is alphabetical by name of county, alphabetically thereunder by name of city or town, and alphabetically thereunder by church denomination. The name of each church is followed by the generally accepted date of its organization or establishment. The inclusive dates and the type of vital statistics records are shown for each church as well as the location of the records and the name of their custodian. The index is arranged alphabetically by the name of city or town. All references in the index are to page numbers.

The survey of churches and church records was made by Historical Records Survey field workers. The publication was prepared in the office of the Survey under the supervision of Nash K. Burger, Project Technician. The vital statistics records of some 3,745 churches have been listed in this volume.

The Survey acknowledges with sincere appreciation the assistance given it in this undertaking by the pastors of the churches and by the officers of church organizations.

The general procedures and regulations of the Service Division of the Work Projects Administration which are applicable to all project units in the 48 States, have been followed in Mississippi. WPA administrative officials have always given the Survey their cordial support and assistance.

The publications of the Survey are distributed without cost to State and local public officials and libraries in Mississippi, and to a limited number of libraries and governmental organizations outside the State. A list of these publications appears on page 702. Approximately 1,900 publications have been released by all units of the Survey throughout the Nation.

ROBERT E. STRONG,
State Supervisor
Statewide Records Project
